Closure Report for Class V Injection Well – Large Capacity Cesspool

Macomb Reservation State Park, 201 Campsite Road, Schuyler Falls, NY 12985

Comfort Station #6 (Injection Well #13), Comfort Station #7 (Injection Well #14),
& Comfort Station #9 (Injection Well #5)

(8/10/2016)

Background & Intent: It is the intent to close the existing cesspool/seepage pits adjacent to Comfort Station #6 (Injection Well #13), Comfort Station #7 (Injection Well #14), & Comfort Station #9 (Injection Well #5) (see attached Map). EPA/DEC is requiring us to close the cesspool/seepage pits for each facility listed above.

- A) **Location plan and site plan of the closures:** - see attached.
- B) **Description of Business:** Camping/campsites/RV Park for the public. SIC code is 7033.
- C) **Description of Fluids injected:** Sanitary Human Waste – There are no drains of any kind located near chemicals / or where Chemical wastes are stored delivered or generated.
- D) **Connection between drains and Injection wells:** The entire well and connection drain and Buildings were removed.
- E) **Description of cesspool closures:** Site was excavated and backfilled with clean inert Sand and stone.
- F) **Contaminant Removal:** All waste/contaminated soils were removed from in and around the cesspool until visibly clean soil was reached. Removal was by excavation.
- G) **Onsite storage:** The material was in a tarp covered dump truck for no more than one day until disposal.
- H & I) **Waste Characterization: Refer to section II which discusses Well Specific Sampling Requirements Section A. 1.) Large Capacity cesspools that have received only sanitary waste. Requirement as follows: “Large capacity” means serves or designed to serve 20 or more people per day. The cesspool must be pumped out and the wastes must be disposed of properly by a licensed hauler. Excavation, end-point sampling and analysis are typically not required.” The waste/fluids that entered the Class V well previously were untreated sanitary waste containing human excreta.**
No testing was conducted.
- J) **Backfill:** The site was backfilled with clean inert Sand and Stone.

- K) **Final Closure Report:** Final Closure Report was sent to:
